We are currently offering temporary, short-term or project based employments or engagements as part-time lecturers for our internet (distant learning) course provider ‘Smerud Statinet’ (please see www.statinet.no). If applicable, the candidate will join our biometrics division with other statisticians and clinical data managers and be integrated into cross-functional projects (randomised clinical trials and entire clinical drug development programs) in order to be obtain on-the-job training.

Responsibilities

- Internet-based supervision of course students
- Exercise review
- Associate roles in:
 - Planning clinical trials
 - Analysing and reporting clinical trial data

Qualification

- Successfully passed an introductory University course in statistics (e.g. MF9130)
- On-going or completed academic degree and/or practical experience in statistics
- Interest in medical statistics
- Familiarity with statistical software (SPSS and other)
- Strong fluency in English and Norwegian/Scandinavian languages
- Joy from teaching undergraduates or fellow students

Location

- Oslo (Norway),

Our offer

- Wide variety in therapeutic areas
- Clients are mainly small biotech start-ups

- Exceptional learning potential and professional development
- Environment of leading strategic, operational and scientific expertise
- International projects, local support
- Interactive and flexible corporate working life, with short lines of command
- Competitive and attractive salary

The company

The Smerud Medical Research Group (SMERUD) is a full-service clinical Contract Research Organisation (CRO) operating in the Northern European area with head office in Norway and subsidiary offices in Denmark, Finland, Sweden, United Kingdom, Germany, Austria and Poland. Our functional clinical trials services are primarily clinical project management, monitoring, pharmacovigilance, regulatory affairs, data management, biostatistics, medical writing in addition to our general drug and device development consulting. Our core competency is expert consulting related to the clinical development plan and specifically to proof-of-concept clinical trials. SMERUD has been operating for 28+ years, and been involved in more than 1500 clinical trials in a wide variety of indications, countries and study phases. We have about 30 clinical development professionals employed, with an additional 20 freelancers and consultants associated.
