

SMERUD
MEDICAL RESEARCH

Now hiring talented professionals for a career in international clinical research

SENIOR BIostatistician

The position

SMERUD is looking for a highly motivated and self-going statistician with experience from medical statistics, ideally from planning and analysing clinical trials in the biotech/pharma sector, to join our biometrics division with other statisticians and clinical data managers. Our portfolio of cross-functional projects (randomised clinical trials and entire clinical drug development programs) is growing, and you will work as a senior professional in one or more such teams.

Responsibilities

- Planning of clinical trials
- Experimental design
- Sample size estimations
- Input to Case Report Form design
- Analyses of clinical trials
- Statistical modelling
- Development of clinical trial analysis plans
- Interpretation of data
- Compiling statistical reports of clinical trials
- Consulting/expert advice to clinical research scientists (project managers) within SMERUD, and high-level project/programme directors and managers within client organisations.
- Consulting/training in medical statistics for academic/investigator groups

Qualification

- Academic degree (at least MSc, ideally PhD) and/or practical experience in statistics, preferably with specialisation in medical statistics
- Familiarity with statistical software like SAS and/or R, SPSS, Stata, Minitab
- Programming experience
- Strong fluency in English, oral and written.
- Integrity and professional attitude
- Accurate, highly structured and analytical mindset
- High working capacity and result oriented

Location

- Oslo (Norway),
- Mannheim (Germany), or
- Manchester (UK).

Our offer

- Wide variety in therapeutic areas
- Clients are mainly small biotech start-ups
- Exceptional learning potential and professional development
- Environment of leading strategic, operational and scientific expertise
- International projects, local support
- Interactive and flexible corporate working life, with short lines of command
- Competitive and attractive salary

The company

The Smerud Medical Research Group (SMERUD) is a full-service clinical Contract Research Organisation (CRO) operating in the Northern European area with head office in Norway and subsidiary offices in Denmark, Finland, Sweden, United Kingdom, Germany, Austria and Poland. Our functional clinical trials services are primarily clinical project management, monitoring, pharmacovigilance, regulatory affairs, data management, biostatistics, medical writing in addition to our general drug and device development consulting. Our core competency is expert consulting related to the clinical development plan and specifically to proof-of-concept clinical trials. SMERUD has been operating for 28+ years, and been involved in more than 1500 clinical trials in a wide variety of indications, countries and study phases. We have about 30 clinical development professionals employed, with an additional 20 freelancers and consultants associated.
